The disclosure is objected to because of the following informalities.

- (a) The application does not comply with the Sequence Rules (37 CFR §§ 1.821-1.825) in that there is no paper copy of the Sequence Listing in the file. Applicant is reminded to supply the appropriate assurances as to no inclusion of new matter and the paper copy being identical to the computer readable form for this application.
- (b) The specification is incomplete in that it does not end with a complete sentence on its last page (page 40).
- (c) Any claim to priority should appear in the first sentence of the specification (MPEP 608.01(a)).

Appropriate correction is required.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 5-7, and 9-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,284,515. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims are embraced by the broader instant claims.

Claims 4, 8, and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,284,515 in view of Dotzlaef et al (U.S. Patent No. 5,508,177). The nucleic acid constructs, vectors, and host used in the claimed methods embrace the nucleic acid constructs, vectors, and hosts in U.S. Patent No. 6,284,515. Dotzlaef et al (*e.g.*, column 3, line 45 through column 7, line 26) teaches the production of *S. aureus* proteins using

recombinant DNA methods in *E. coli* host cells. It would have been obvious for one of ordinary skill in the art at the time the invention was made to produce the *S. aureus* proteins encoded by the constructs in claims 1-10 of U.S. Patent No. 6,284,515 in the manner taught by Dotzlaef et al in order to make large amounts of polypeptides.
